PERFORMANCE

KEY BENEFITS

EXO FLOAT ASSIST

Our proprietary ExoFloat System features an exoskeleton that is fully body mapped with hi-tech flotation panels that help assist you in case of a fall. It also has mesh panels at the bottom to evacuate water. For optimal performance, wear the Stamina Float jacket and Stamina pants together or wear the new Stamina Float jacket alone.

KEY TECHNOLOGIES

SELF LEVELING

Strategically placed Exofloat panels help assist you in self leveling to the surface

EXIT ASSIST

Mesh drainage to ensure you are not weighed down by the water that can inhibit exit

FLOAT ASSIST

For more than 30 minutes (*rider must exit within this timeframe to avoid hypothermia)

This is not a coast guard approved personal flotation device, this is a flotation assistance technology. We do not recommend riders to drive over unsafe frozen bodies of water.

SYMPATEX KEY TECHNOLOGIES

sympatex®

PERFORMANCE

Re>Think Performance - Dynamic Breathability

In contrast to other membrane technologies, the poreless compact Sympatex membrane is based on a physical and chemical principle. The water-attracting (hydrophilic) part of the membrane absorbs the moisture from the body and emits it to the outside by evaporation. The water vapour molecules are transported outwards along the hydrophilic molecular chains. The molecular structure (hydrophilic components) of the Sympatex membrane swells in moisture and therefore provides space for water vapour transport and fast evaporation.

TECHNOLOGIES

OUR RIDING GEAR AND TECHNICAL WEAR ARE BUILT WITH ADVANCED TECHNOLOGIES THAT PROTECT YOU WITH WARMTH, WATERPROOFNESS, LIGHTWEIGHT AND BREATHABILITY.

PRIMALOFT®

A high-performance insulation with the full spectrum of benefits to brave the elements. Warmer, drier, softer and more compressible than any other synthetic insulation.

sympatex®

RPM/RPM MAX

Coatings that provide maximum waterproofness, windproofness and breathability.

RPM Max: All seams & logos sealed

RPM: Critical seams & logos sealed

YKK

We use the world's best - YKK zippers - recognized for quality and reliability.

eLinQ CONNECTOR SYSTEM

Some of our Lynx jackets have provisions built in for a heated shield wire - riders can leave the wire in the jacket securely fastened and out of the way.

REINFORCEMENT FABRIC

Often added to garment zones that need extra durability, such as arms, back hem, inner legs, and crotch for tough yet flexible comfort.

SQUADRON

A snowmobiler in a red and black suit is riding a snowmobile through a snowy forest at night. The snowmobiler is wearing a helmet with a clear visor and is looking towards the camera. The snowmobile is black and red, with the number '850' visible on the side. The background is a dense forest of snow-covered trees, and the ground is covered in snow. The overall scene is dark and atmospheric.

PERFORMANCE**KEY BENEFITS**

LYNX APPAREL LAYERING PIONEERS

1

Wearing properly layered clothing starts with a high-quality **base layer**.

2

The mid layer helps to regulate the body temperature.

3

Insulated layer. Add or adjust the warmth with insulated layer. Insulated jacket protects from the elements with additional warmth.

4

Shell layer. Choose the outermost layer based on the temperature, the length of the trip and your riding style.

Enjoying the winter is often just a matter of dressing up. We at Lynx are pioneers in equipping the riders for demanding Nordic conditions.

Using high performance fabrics and insulation, the Lynx Tec-Layer product range offers a combination of moisture management, warmth, packability and protection in changing weather conditions and multiple activities. Keep yourself comfortable even during your toughest snowmobiling adventures!

GEARING UP FOR THE RIDE

” There’s no bad day, if you’re geared up right!

Some people may think that cold weather or lack of daylight is a reason to postpone your ride, but that’s not actually true. It’s all about gearing up right. Cold is not actually cold if you have right layers.

What I like to have is merino layers, thermo layers and sometimes even fleece, but I never go out without a protection. If you protect your head, remember to also protect your body.

Now that I’m all geared up, I’m ready to ride!

- Emma Kimiläinen, Lynx ambassador

WINTER'S NOT
A SEASON. IT'S
A LIFESTYLE.

ACTIVE

Keep your engine running all year round!

When snow turns to slush and trails turn to tracks, it's time to train. In the gym. On the bike. Through the woods. Counting down the days to that first fresh fall. Muscles burning. Longing for the cool breeze on your face. You can almost feel it. Not long now. Winter is almost here.

The original Lynx Active range sees you through off-season, dialing up the technical details that keep your engine running all year round. You will stay comfortable and protected from the top of

the mountain down to the trails and in different activities. From jerseys to keep you dry and prevent overheating to lightweight, breathable and waterproof outerwear, you are ready to go!

ELINQ

As snowmobilers, we love the freedom our sleds bring us. It's addictive. And that's why we continue to add ways to find more of it in every ride.

eLinQ is an innovative solution that connects your heated gear and accessories to your snowmobile without adding more corded connections.

eLinQ combines your Lynx DESS tether into both a tether and a 12-volt accessory connection in one cord. A magnetic connector mounts to the sled next to the DESS post to provide the electric connection necessary to power any 12-volt accessory like heated shields, gloves, boots, and more.

FIDLOCK SYSTEM

FIDLOCK helmet buckles combine safety with single-handed use and comfort, even with gloves, for innovative head protection. The magnetic, automatic closing mechanism makes fastening a helmet as easy as possible for users. The single handed use allows our helmet buckles for sports, work and other activities to be opened quickly and intuitively.

HOW TO CHOOSE LENS COLORS?

On brighter days, a darker or mirror lens will help to protect your eyes more from the harsh reflections of the sun on the snow. Flat light conditions require a lens that will allow more light through so you can use all the available light to your advantage. Medium tint lenses are made to be adaptable to a variety of

conditions. Lightly tinted lenses allow as much light in as possible and provide you with enhanced contrast throughout those darker days and snowfall. Clear lenses also for snowfall and dark conditions.

All Radien lenses are UV (UVA/UVB) protected.

Smoke VLT 6.83%		Smoke lens tint ideal for very bright and sunny conditions.
Fire mirror VLT 19.94%		Amber base lens tint with multi-layer red mirror designed to filter out blue light for enhanced shadow contrast in moderately flat light conditions.
Blue mirror VLT 18.93%		Designed to reduce overall brightness while preserving 100 percent normal color recognition.
Pink mirror VLT 22.94%		Designed to reduce overall brightness while preserving 100 percent normal color recognition.
Green mirror VLT 33%		Designed to reduce overall brightness while preserving 100 percent normal color recognition.
Fire mirror VLT 19.94%		FOR ENHANCED SHADOW CONTRAST Amber base lens tint with multi-layer red mirror designed to filter out blue light for enhanced shadow contrast in moderately flat light conditions.
Yellow VLT 61.65%		A vibrant lens tint with light silver mirror that increases visual acuity in extremely flat and low light conditions.
Gold VLT 74.13%		Light rose base lens tint with a multi-layer gold mirror enhances color definition and increases depth perception in varying levels of low-light conditions.
Yellow VLT 61.65%		A vibrant lens tint with light silver mirror that increases visual acuity in extremely flat and low light conditions.
Clear VLT 83%		The ideal lens for dark, night-time use and snowfall conditions.

HOW TO MEASURE

SIZING CHART

HEIGHT: without shoes, standing with heels and back against a wall.

HEAD: around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

ARM LENGTH: let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

CHEST: measure under your arm, around the fullest part of your chest.

WAIST: immediately below the lowest rib.

HIPS: across the fullest part of the seat.

INSEAM: without shoes, from crotch to the floor.

GLOVES: Measure palm width.

BOOTS: Foot length from heel to toe.

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.
